

PARTNER PROGRAM

DOSarrest's Partner Program provides Hosting Providers, MSPs, and IT Resellers a fully managed cloud-based DDoS protection service that gives you the edge you need to increase your business revenue and bottom line profits. At the same time it allows you to provide your customers with a proven DDoS protection solution. The DOSarrest solution includes the following services:

SECURITY SERVICES

DDoS Protection service provides the following benefits :

- A Global network capacity of 3Tbps and is expanding
- A complete comprehensive cloud based website security service
- All infrastructures are owned and operated by DOSarrest.
- Stop any and all attacks, period! Backed by an SLA
- PCI level 1 certified
- 11 years of experience in DDoS protection
- 99.99% Uptime guarantee
- Globally distributed nodes

DOSarrest DDOS protection includes the following services:

Web Application Firewall (WAF)

best of breed. protect your site from zero day threats and vulnerabilities.

Geo Load Balancing

Enables customers to spread out their website resource requirements across multiple servers.

Content Delivery Network

Performance optimization. DOSarrest's service acts as a CDN and can cache any date desired.

External Monitoring Service (DEMS)

View real-time performance and up-time stats from 8 different sensors that are dispersed around the globe.

API

DOSarrest Internet Security have released a new Application Programming Interface(API) for their latest generation of Internet Security Services Software, enabling MSSPs to directly access any and all of DOSarrest's cloud based Security Services. This allows any organization to integrate into their existing customer portals any of DOSarrest's services which include DDoS protection, CDN, best of breed WAF, global load balancing as well as any future services on their aggressive roadmap.

ASSOCIATED ADD ON SERVICES

Vulnerability Testing and Optimization.

DOSarrest experts will work with MSSP's to scan your clients websites and provide a detailed report on any deficiencies as well as recommend a remedial course of action if one is required.

The Datacenter Defender (DCD) -

GRE platform is a network designed by DOSarrest. The DCD will essentially ingest all traffic for specific subnets that is destined for any datacenter or hosting company filtering out nefarious from legitimate traffic and tunnel legitimate traffic back over to the target location.

The Cyber Attack Preparation Platform (CAPP)

is a DOSarrest developed advanced botnet simulation platform that can intelligently generate controlled/simulated DDOS attacks to assess how different defense systems can detect and prevent against malicious traffic.

All DOSarrest services are fully managed by a 24/7 SOC with phone and/or email access.

ABOUT DOSarrest

DOSarrest is a fully managed cloud based internet security service that provides DDoS protection for websites.

The service is primarily for medium to large E-commerce sites. Its customer base comes from the following industries: Health care, Gaming, Online Payment Processing, Banking, Stocks / Brokerage, Governments and Affiliates, General E-commerce, Education, and Media. The service prevents disruption of sites from DDoS attacks and other malicious traffic. In 2014, DOSarrest Received Security Product of the Year at the UK Cloud Awards-2014 for its Proxy Defense service.

DOSarrest also offers additional services to complement its DDoS offering. These services are Cloud Based Web Application Firewall (WAF), Vulnerability Testing and Optimization (VTO), Cloud Based Layer 7 Load Balancing, and DOSarrest External Monitoring Service (DEMS). Learn more at DOSarrest.com

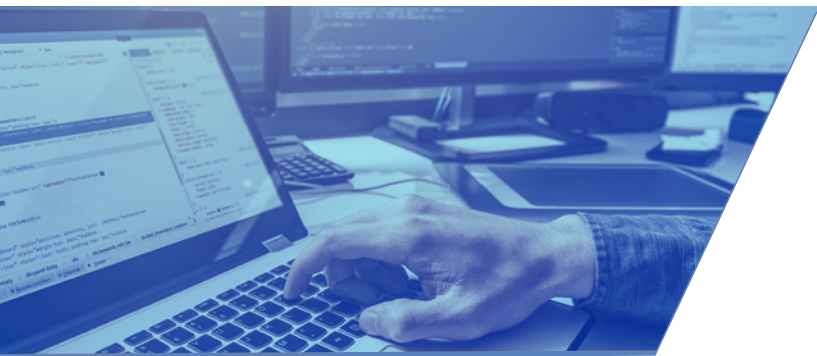

Level 1 PCI certified and GDPR compliant.

WHY PARTNER WITH DOSarrest

DOSarrest's DDoS protection service has evolved over the years to handle the largest and the most sophisticated attacks.

Superior 24/7/365 Support

Our 24/7/365 Security Operation Center is manned by experienced engineers that can make any adjustment, customization or simply answer a question.

Easy to Sell

Valuable and comprehensive solution that is easy to setup and deliver to your customers.

Increased Customer Satisfaction

In addition to DDoS protection, many clients experience an improvement in their website's performance, thanks to the caching capabilities of our built in Content Delivery Network (CDN) which supports the DOSarrest Proxy Defense product.

Simple Implementation

We provide immediate protection (less than 15 minutes) for any website in any location. Taking care of large, complex DDoS attacks has never been easier.

Add Additional Revenue

DOSarrest partners receive commission based on monthly net revenue.

DDoS Protection is our flagship internet security service that's been protecting thousands of websites from DDoS attacks since 2007.
